

TECHNOLOGY BASED SMART SOLUTIONS

Lythix offers industry-leading technology and exceptional service that yields meaningful insight. With an unwavering commitment to integrity, we work jointly as a team with our clients to produce significant value and results.

ENGINEERING

Our Engineering and Project Management team offers a wide range of distribution, transmission, and electrical engineering solutions to complete a reliable, comprehensive design that promotes safety and accommodates all present or future load. Our long standing relationships with local utilities help streamline the process of electrification to your location to reduce delays.

SURVEY

Our Survey team offers surveying services from preliminary, routing, and staking to as-builts on all your infrastructure needs. We specialize in oil and gas surveying, wind/solar energy related surveying, boundary, urban and rural surveying, and Geographic Information Systems (GIS). We use the latest in technology to provide the most efficient services and accurate deliverables to fit your needs.

UAV

Our UAV team focuses on aerial mapping, thermal inspections, and surveying with Unmanned Aerial Vehicles (UAV) to help gauge assets quickly and efficiently, saving time and money. Our pilots are some of the most experienced in the industry and hold multiple certification and licenses.

ENERGY

Our Energy Solutions team is committed to providing energy advisory services that enable our clients to maximize control of their energy spend category. The team takes the time to understand the clients' needs and risk tolerance and tailors comprehensive solutions that help clients achieve their goals.
